**JUWathan+®  
Wheels**

with Aluminum Core

**Patented roller material is baked in oven over long period for elasticity and extreme toughness!**

Non floor damaging	For smooth and rough floors	Overcomes small obstacles easily by molding around them to keep rolling.	Low floor pressure	Shock absorbent	<b>Superior performance and durability over traditional polyurethane, composite or steel wheels</b>
Non floor marking	For floors with cracks and dirt	No stop, up & over action required like with other wheels.	Low break out & low rolling resistance	Reliable under toughest working conditions	
	For both inside and outside use		Low push-pull force and low manpower requirements		

**MADE IN GERMANY**  
By JUNG

**5 Year Manufacturer's Warranty**  
(damage due to overloading not covered)
